

1. Create zones for a multipurpose space.
2. Keep non-laundry related items separate.
3. Create 3 Power Zones.
  - Clean (items that are folded and ready for drawers)
  - Dirty (items sorted by wash loads: dark, light and white)
  - Pending (items to be folded and ironed)
4. Create a work zone by installing a wide shelf for folding and sorting. Install work shelf at a good folding height for standing, or for sitting at bar stool height.
5. Utilize space underneath folding shelf to store laundry baskets.
6. Utilize vertical space by adding wall shelves for extra storage.
7. Get matching storage baskets; consider using a different color for each family member.
